Retrospective

What did we do well?	What should we have done better?

- Brainstormed the idea for the prototype
- Chose prototype idea that aligned with the spirit of the RFQ
- Tried out 2 technology candidates
- Strong coordination in the team
- Achieved the objectives of the RFQ, we now have more time to implement nice to have features

- We could have focused more on unit testing as we did development
- Document some of the evaluation tasks (e.g. out choice of Amazon ElasticBeanStalk, Codeship)
- Should have created additional branches for feature investigations

Actions

@ Vijay Goswami   document reasoning behind some of the decisions
